About Us

Frutifera SAS. Our direct ties with the Colombian field provide us with extensive experience in the world of tropical fruit pulps and endorses us as a leading company in this sector.

With a philosophy based on sustainability, social responsibility, and quality, we hold a business commitment that seeks to anticipate and manage current market risks

At Frutifera we specialize in the generation of fruit pulp, including: Soursop, Passion Fruit, Pineapple, Mango, Lulo, Blackberry, Strawberry, Carambola, Uchuva, Grape, Tamarind, Guava, Tangarine, Papaya, Lemon, Carambolo, Borojó and Arazá (also fruit mixes) as our main products. Our employees are constantly trained in good production management practices and quality standards (GMP).

No additives or artificial colors

Our product is Natural, without additives or artificial colors, we have automated process as well as 100% manual production lines that guarantee the natural presentation of the fruit without the stress caused by machines.

“ *At Frutifera
We know our
Fruits...*

”

We provide the best Quality

*All our wisdom
is stored in our Fruits*

Our style is natural, delicious, practical, and nutritious pulps (products rich in vitamins, minerals, antioxidants and fiber) No added sugar, no flavorings, no colorings, no preservatives.

We use high quality fruits from Colombian growers responsible with the environment. We investigate the development of new technologies for the optimization of resources.

Production volumen and capacity

We export from all ports (Pacific and Atlantic ocean), we have a production capacity of 50 tons per month, per fruit. Our production and marketing model allow us to guarantee the supply of our products throughout the full year.

*The Only difference
between the whole fruits and
our product is the packaging...*

Export Destinations +

Frutifera has representation in the United States (Frutifera USA) which allows us commercial agility and provide competitive advantages.

We export to Central and North America, Europe, Asia and also cover the Colombian market.

Product Catalog +

These are the pulps which Frutifera offers:

Currently we can supply the market with a wide variety of tropical pulps, which are representative in our country of origin, Colombia.

This allows us to carry out a rigorous quality control and have the necessary knowledge to provide an optimal product to our clients.

Our catalog is mainly made up of these varieties of pulps:

Passion Fruit

Passion fruit is very rich in vitamin C, beta-cryptoxanthin and alpha-carotene which boosts your immune system.

Soursup

Both the fruit and the leaves are attributed medicinal properties. The most widespread is that cures cancer, its juice is very delicious.

Lulo

Lulo or Naranjilla, its benefits include ability to improve the immune system, build strong bones, improve vision, regulate digestion and relieve stress.

Mango

Mango is also known as "King of the fruits". It is the most consumed fruit in the world.

Papaya

Papaya is an excellent source of vitamin C, half a fruit provides more of the intake recommended daily.

Pineapple

The fruit for consumption may be fresh and canned. In the West it is used usually as dessert and in salads.

Blackberry

Berries offer many health benefits health, full of vitamins and minerals like C, and manganese.
